EDUCATION

National Institute Of Technology, Hamirpur

2026

Bachelor of Technology, Electronics and Communication *CGPA - 7.56*

Dayanand Bhartiya Public Sr. Sec. School

Joginder Nagar, H.P

Class XII *Percentage - 96.4*

2021

Class X *Percentage - 90*

2019

SKILLS

Programming Languages

Python, C/C++, SQL

Machine Learning & AI

Supervised Learning, Unsupervised Learning, Model Evaluation, Feature Engineering

Deep Learning & LLMs

Neural Networks, NLP, LangChain, Prompt Engineering, Gemini AI, RAG Systems

Data Science Libraries

Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn

AI/ML Tools

Jupyter Notebook, Google Colab, VS Code

Database Systems

MySQL, MongoDB

Core CS Concepts

Data Structures & Algorithms, OOP, DBMS

Deployment & Tools

Streamlit, Git, GitHub, Hugging Face Spaces

PROJECTS

AI Resume Analyzer — Gemini AI + LangChain + Streamlit

Python — Streamlit — LangChain — Gemini AI — NLP — Hugging Face

[Live Demo](#)

- Developed an AI-powered resume screening tool that compares candidate resumes with job descriptions using Large Language Models (Gemini AI).
- Implemented PDF resume parsing and text extraction for structured analysis.
- Designed a LangChain-based prompt pipeline for skill matching, relevance scoring, and improvement suggestions.
- Built an interactive Streamlit web application for real-time resume upload and AI-based evaluation.
- Deployed the application on Hugging Face Spaces for public access.

LangChain-Groq Chatbot — AI Conversational Assistant

Python — Streamlit — LangChain — Groq API — LLMs

[Live Demo](#)

- Built an interactive AI chatbot using LangChain and Groq's high-speed LLM inference API for real-time responses.
- Designed prompt engineering workflows to manage conversational context and improve response accuracy.
- Integrated Streamlit to develop a user-friendly web interface for seamless chat interaction.
- Implemented real-time streaming responses to enhance user experience and reduce latency.
- Deployed the chatbot as a fully functional web application for public access.

Cancer Risk Prediction using Machine Learning

Python — Scikit-learn — Pandas — NumPy — SMOTE — Matplotlib — Seaborn

[Live Demo](#)

- Developed a machine learning model to predict cancer risk levels (Low, Medium, High) using demographic and health-related features.
- Performed exploratory data analysis (EDA) to understand data distributions, correlations, and feature importance.
- Applied data preprocessing techniques including handling missing values, label encoding, and feature scaling for better model performance.
- Addressed class imbalance using SMOTE to improve fairness and prediction accuracy.
- Trained and compared multiple classification models including Logistic Regression and Random Forest Classifier.

ACHIEVEMENTS & CERTIFICATIONS

- Solved **100+ SQL problems** on **LeetCode**, strengthening database querying and problem-solving skills.
- Successfully completed a **Quant Internship assignment**, demonstrating skills in data analysis, financial concepts, and problem-solving under real-world constraints.
- **Finalist – Chalaang 4.0 Innovation Challenge**, selected among top teams for developing innovative, real-world solutions.
- Relevant Coursework: **Financial Markets (Self-Study), Algorithmic Trading Fundamentals, Statistics for Data Science.**

POSITIONS OF RESPONSIBILITY

- Discipline Secretary, NIT Hamirpur Hostel

2023 – 2024

 - Ensured discipline and acted as the primary liaison between 200+ hostel residents and the administration.
- Technical Coordinator, Cultural Fest, NIT Hamirpur

2025

 - Managed technical arrangements for 10+ cultural events and coordinated across 5 teams for smooth execution.
